Re: Supplement to Request for Notice to Proceed With Use of Contractor Yards, and Fugitive Dust Plan
Rover Pipeline LLC (Rover Pipeline Project)
Panhandle Eastern Pipe Line Company, LP (Panhandle Backhaul Project)
Trunkline Gas Company, LLC (Trunkline Backhaul Project)
FERC Docket Nos. CP15-93-000, CP15-94-000, and CP15-96-000

Dear Ms. Bose:

On February 2, 2017, the Federal Energy Regulatory Commission ("FERC" or "Commission") issued an Order Issuing Certificate ("Order")¹ for the Rover Pipeline, Panhandle Backhaul, and Trunkline Backhaul Projects (collectively "Applicants").

Rover is submitting herein supplemental information for its proposed contractor yards. Please note that Rover is only requesting permission to utilize the 16 yards for which landowner approval has been obtained as noted in Table 5-1 submitted to FERC on February 16, 2017, in its Request for Notice to Proceed with Construction ("Notice to Proceed"). Rover will request approval for the other contractor yards noted as "pending" in Table 5-1 upon receipt of landowner agreements. Therefore, this response and the requested Notice to Proceed pertains only to these 16 contractor yards.

Rover asserts that there are no trees located within the limits of disturbance at these 16 contractor yards. Although aerial photography (dated 2015) may depict forested areas or individual trees, these areas were previously cleared by the landowners or previous occupants. Rover proposes to install steel reinforced silt fence, further reinforced with a layer of straw bales for additional protection, 25 feet from the boundary of all streams and wetlands located within or adjacent to the limits of disturbance. Enclosed are figures depicting each of the 16 requested yards, and any wetlands and waterbodies within those yards, and the 25-foot buffers. Please note that the access road to the Spread 7 Contractor Yard in Lenawee County, Michigan crosses a stream; however, there is an existing bridge across the stream. Rover does not intend to widen or improve the road, and will install erosion control devices as necessary pursuant to the Rover Procedures.

In addition, please find enclosed consultation with the Ohio State Historic Preservation Office indicating their approval of the requested contractor notes regarding the restoration of Spread 1 Main Contractor Yard 1 Option 4A and 4B.

In compliance with Environmental Condition No. 20 under Appendix B of the Commission's Order, Applicants are submitting a revised Fugitive Dust Control Plan for the Projects with updates depicted in red text.

¹ *Rover Pipeline LLC, Panhandle Eastern Pipe Line Company, LP, Trunkline Gas Company, LLC*, 158 FERC ¶ 61,109 (Feb. 2, 2017).

This filing is being submitted electronically to the Commission's eFiling website pursuant to the Commission's Order No. 703, Filing via the Internet Guidelines issued on November 15, 2007 in FERC Docket No. RM07-16-000. Any questions or comments regarding this filing should be directed to the undersigned at (713) 989-2024.

Respectfully submitted,

/s/ Stephen T. Veatch
