Re: OEP/DG2E/Gas Branch 4
Rover Pipeline LLC (Rover Pipeline Project)
FERC Docket No. CP15-93-000
Supplemental Information to the Environmental Report

Dear Ms. Bose:

On February 20, 2015, Rover Pipeline LLC ("Rover") submitted for filing with the Federal Energy Regulatory Commission ("FERC" or "Commission") an application pursuant to Section 7(c) of the Natural Gas Act, and Parts 157 and 284 of the Commission's regulations requesting authorizations, among other things, to construct, own, and operate a new interstate natural gas pipeline system extending from the Marcellus and Utica shale supply areas in West Virginia, Pennsylvania, and Ohio to a point of interconnection with the Vector Pipeline, LP ("Vector") system in Livingston County, Michigan.

Attached herein for filing is Supplemental Information to the Environmental Report for the Rover Pipeline Project ("Project") filed February 20, 2015 identifying two route variations to the proposed route to avoid newly constructed industrial facilities. The route variations are located at approximate Milepost 24 on the Seneca Lateral and between Mileposts 0.7 and 2.84 on the CGT Lateral. The route adjustment on the Seneca Lateral will reduce the number of perennial streams and forested wetland acreage affected. The CGT route adjustment will affect a similar type and quantity of environmental resources, with no impacts to wetlands and only streams affected. All landowners affected by the route adjustments have been previously included on the FERC and Rover mailing lists.

This filing is being submitted electronically to the Commission's eFiling website pursuant to the Commission's Order No. 703, Filing via the Internet Guidelines issued on November 15, 2007 in FERC Docket No. RM07-16-000. Any questions or comments regarding this filing should be directed to the undersigned at (713) 989-2606.

Respectfully submitted,

/s/ Kelly Allen
